(54) BATHING AGENT

(57) Abstract:

PURPOSE: A water-soluble sheet bathing agent which comprises pullulan, etc., is rapidly and completely dissolved in warm water in a bathtub when added thereto, causes no bathing scum, etc., has skin wetting action, stabilizing effect on preservation of other component, preventing action on removal of perfume and raised bathing effect.

CONSTITUTION: A water-soluble sheet which comprises a sheet of pullulan, a water-soluble high polymer substance well-known as a polysaccharide con-

sisting of a neutral monosaccharide produced by *Aureobasidium pullulans* in the outside of mold, if necessary, polyvinyl alcohol and polyvinyl pyrrolidone to raise film-forming properties besides pullulan, further incorporated with at least one selected from a humectant, essence extracted from crude drug, perfume and colorant in the sheet and may be laminated in plural layers.

EFFECT: Dispersing fragrance sufficiently during dissolution preventing bad impression of too strong fragrance before dissolution caused by conventional bathing agent.
